Market Research

Industry

Built-Rite Toys will be a part of the toy manufacturing industry. Currently, wooden toys are considered a niche market, comprised of different sized companies. The largest companies, such as Plastique Toys and Metal Happy Toys, have large inventories of products that are offered internationally. The smallest companies sell locally either in shops, at craft fairs, or online.

This industry is currently suffering from the economic recession as consumers are spending less on non-essentials. However, industry revenues increased by \$1.2 million in the 2nd quarter of 2012. This means there is a potential for growth as the economy recovers.

Detailed Description of Customers

The two groups that the company plans to market to are parents (age 18-30) of young children and grandparents (age 60-75) of young children with an income range of \$35,000 - \$80,000 a year. Our target customers are interested in giving durable, well-made toys to their children and grandchildren to help foster creativity. They value quality and they research the products they buy. Our target customers are willing to spend more money on products that are of higher quality and last longer.
